The physical keyboard also supported. CIÅ² is made to ensure that members of groups are active. You subscribe to this release channel by joining the Google Groups group and opt for this link. All have bugs, but they have a different subset of bugs and fixes from a fork are rarely applied or brought to other forks. AddOns Each new commit to the master branch will distribute all add-on to the BETA channel in Google Play-Store. Through Bountysource, users can claim them when fixing bugs. Remember: Components in this repository are released under the Apache2 license. Special effects of pressing keys: Sound when the button is pressed (if the phone is not turned off). To access this channel, visit this link. Features All types of keyboards: Support for multiple languages via external packages. Word tips and next Word tips, Every day, if no commit is made, we will increase the installation. License Copyright 2020 Menny Even-Danan Licensed under the Apache License, Version 2.0 (the "License"); you will not be allowed to use this file unless in compliance with the License. Learn more! Crowdin to translate the app into your language. See the License for the specific language that regulates permissions and restrictions based on the License. Beta versions are pushed through the Google Play Store. Read more! Our fancy website Language-Pack add-ons in this repo. Every Wednesday the last ALPHA will be promoted to BETA. More information about AnySoftKeyboard is available here. Discussions can be found at Å²ÅÅ Å GitHub Chat Channel Support can be found on master builds pi! Android master coverage (f/w 4.0.3+, API level 15+) on the screen keyboard for multiple languages. Lots of emoji - long press the smiling key.
